

KAKAPO IMPACTOR

Safe, Compact Post or Pile Driver Attachment

KAKAPO IMPACTOR

Safe, Compact Post or Pile Driver Attachment

- Mounts to a skid steer loader, excavator or tractor, up to 1/3 of normal size
- Can be mounted at the front, side or rear of base machine
- Operated by one person, from the safety of the base machine seat
- Post picked up, positioned and held safely top & bottom by grapple
- No hands anywhere near the post or impact weight
- Operator can position post on other side of wire, level and drive it from machine seat
- Equal or greater driving power, to existing, large, falling weight post drivers
- Easily manoeuvrable, due to compact design and low operating height
- Short, safe 100mm stroke from an internal impact mechanism
- 100% power from any height to below ground level, if required
- Virtually no recoil into base machine or pulse to hydraulics
- Peer reviewed by The University of Waikato, Hamilton, New Zealand
